My score: ____ / 10

Bugs & Butterflies

Answer key with fun facts · Ages 6+

- 1** A daddy-long-legs crane fly is a type of spider.
Answer: False
Crane flies are insects with six legs and two wings.
- 2** What is the UK's largest wasp?
Answer: A. Hornet
European hornets are big, but they're usually less aggressive than common wasps.
- 3** Which bee lays all the eggs in a honeybee hive?
Answer: C. The queen
A queen honeybee can lay well over 1,000 eggs in a day in summer.
- 4** All worker honeybees are female.
Answer: True
The workers do almost all the jobs in the hive, from cleaning to collecting nectar.
- 5** Spiders are insects.
Answer: False
Spiders are arachnids. They have eight legs and two body parts, not six legs and three.
- 6** Ladybirds are a type of beetle.
Answer: True
Their spotty wing cases protect a pair of delicate flying wings underneath.
- 7** What do bees collect from flowers to make honey?
Answer: C. Nectar
Pollen is collected too, but it's used as protein-rich food for the young.
- 8** Most moths fly at night.
Answer: True
Some moths, like burnets and hummingbird hawk-moths, fly in the daytime.
- 9** How many wings does a dragonfly have?
Answer: A. Four
Dragonflies can move each wing on its own, so they can fly backwards and hover.
- 10** How many spots does a seven-spot ladybird have?
Answer: B. Seven
The seven-spot is the UK's most familiar ladybird.
